

Automation- Here's Why You Should Care

Imagine all the documents that come across your adjuster's desks each day. Does the pile ever seem to shrink? Try as they might to make sure that claims are staying on track, the amount of incoming paper makes that an almost impossible task. As a result things slip through the cracks and you pay for things you might not need to.

Time to Clear the Clutter

Spending money where you could easily save money doesn't seem to be a good business strategy for any organization, yet many in our industry seem to accept this overwhelming state of affairs as a given. For those willing to take a stand, *Acrometis has the solution.*

What if you could automatically eliminate 70% of those documents from your adjuster's desks, shrinking that incoming amount from a full blast firehose to a trickle? Now your adjusters can actually do their job effectively and save you money in the process.

Make the impossible task, possible.

CLAIMExpert, the industry's leading claims processing platform, can **auto-adjudicate 70%** of documents that come into your claims shop, **processing over 130 different document** types. A large portion of what gets eliminated is white mail or bills that can be automatically routed, and your adjusters receive the remaining 30% that really needs a discerning human decision. Our process can give adjusters back 40% of their day- just imagine what they can do with that time.

Documents come in to CLAIMExpert first, which identifies them as needing review or not. If they do, CLAIMExpert alerts adjusters so they can take quick and appropriate action. Every action taken by CLAIMExpert or your adjusters is time-stamped and logged for audit purposes. Of the bills and documents that CLAIMExpert rejects outright, 81% are never resubmitted.

Now That Adjusters Can Do Their Jobs, What Else Can You Expect?

The efficiencies and benefits gained with CLAIMExpert aren't just limited to the success of your adjusters. Our clients have experienced an **11 point reduction in medical loss** in the first year after implementation. As time goes on and we fine-tune our rules to fit your business needs that number can increase even more; some of our clients have seen up to a 31% reduction in loss and LAE.
